## NIKKO BUSTILLO

### FULL STACK WEB-DEVELOPER

### SPECIALIZED IN FRONT-END DEVELOPMENT

---

#### ABOUT ME

Full Stack Web Developer with an emphasis in front-end work. Passionate about making websites aesthetically pleasing and bringing the application to life. Capable of building sophisticated websites and applications with full database backend all the way from mockup to rollout. Adept at working within the full Software Development Lifecycle in a team, or individually as needed. I offer my full commitment, and be a pleasant and friendly addition to your team.

#### TECH SKILLS

**SYNTAX:** HTML5, CSS, Responsive Design, JavaScript, jQuery, Handlebars, Cookies/Local Storage,

**FRAMEWORK:** Bootstrap, Materialize, Material Design Lite

**SERVER-SIDE:** Node.js, Express, User Authentication, MERN Stack MongoDB, Express.js, React.js

**DATABASE:** Firebase, MySQL, MongoDB

**DEPLOYMENT:** Heroku, GitHub

#### PROJECTS

##### CLOCK

**REPOSITORY:** <https://github.com/NikkoMB/clock>

**TECH:** HTML, CSS, JavaScript, Node.js, Express.js, Heroku, RESTful API

*An application where it tells you the time of the day, the day of the month, and temperature. The application's background will change by the time of the day (morning, afternoon, night). API is proved by darksky.net for temperature. Deployed by Heroku and server-side by Node.js/Express.js.*

##### DWAYNE MEDIA

**REPOSITORY:** [https://github.com/NikkoMB/dwayne\\_u](https://github.com/NikkoMB/dwayne_u)

**TECH:** HTML, CSS, JavaScript, Node.js, Express.js, Material Lite Design, Heroku

*Freelanced a personal website for my friend Dwayne for his job at Kidz Bop. The website is ran by Node.js and frameworked with Material Design Lite. While using Express.js to handle all of my pages. I learned more about Node.js through the trials and errors of this project.*

##### POKEGACHI

**REPOSITORY:** [https://github.com/NikkoMB/pokemon\\_new](https://github.com/NikkoMB/pokemon_new)

**TECH:** HTML, CSS, JavaScript, Node.js, Express.js, Heroku

*Pokemon themed application that allows you to choose one Pokemon. Once chosen, you will need to feed the Pokemon rare candy in order to have it evolve. It takes 5 rare candies to evolve the first time and 10 rare candies in order to evolve to the last Pokemon stage. Application's server side is rendered by Node.js/Express.js and deployed by Heroku.*

#### EDUCATION

**RUTGERS CODING BOOTCAMP - FULL STACK DEVELOPER CERTIFICATE** ( APRIL '18 - OCTOBER ' 18, SOMERSET, NJ)

*6 month coding bootcamp program ran by Rutgers University. The program taught back-end and front-end development technology, databases, and languages.*

#### WORK EXPERIENCE

**TENDER TOUCH - LINDEN, NJ** (November '17 - Present)

**DESCRIPTION:** Handling with patients and transporting them. Filing patient documents in Optimum database software and preparing therapy item request orders on Parachute.
